

Senior React Native Developer

Job Description

We are looking for a Senior React Native developer interested in building performant mobile apps on both the iOS and Android platforms. You will be responsible for architecting and building these applications, as well as coordinating with the teams responsible for other layers of the product infrastructure. Building a product is a highly collaborative effort, and as such, a strong team player with a commitment to perfection is required.

Responsibilities

- Develop and maintain high-quality mobile applications using React Native for iOS and Android platforms.
- Leverage native APIs for deep integrations with both platforms.
- Write clean, maintainable, and efficient code while adhering to best practices.
- Participate in code reviews, design discussions, and architecture decisions.
- Optimize application performance for maximum speed and scalability.
- Diagnose and fix bugs and performance bottlenecks for performance that feels native.
- Reach out to the open source community to encourage and help implement mission-critical software fixes.
- Maintain code and write automated tests to ensure the product is of the highest quality.
- Transition existing React web apps to React Native.

Skills

- Proficiency in JavaScript, TypeScript, and React/React Native.
- Knowledge of functional or object-oriented programming
- Should have knowledge of redux, redux-saga, hooks, axios
- Ability to write well-documented, clean Javascript code
- Solid understanding of mobile UI/UX principles and best practices.
- Should be aware of app deployment process(for both android and ios)
- Rock solid at working with third-party dependencies and debugging dependency conflicts
- Familiarity with native build tools, like XCode, Gradle (Android Studio, IntelliJ)
- Should have experience of debugging app on xcode and android studio
- Understanding of REST APIs, the document request model, and offline storage
- Experience with automated testing suites, like Jest or Mocha
- Should have experience of version control tool(git, bitbucket)

Requirements

- Upto 5-6 years of relevant work experience
- BS or higher degree in Computer Science or relevant fields

Job benefits and compensation

- WebShar offers a very competitive salary depending on experience
- MacBook Pro
- Flexible time / and availability to work from home from time to time
- 24 days paid vacation each year (CL, PL, SL), earned at a rate of 2 days per month.
- Medical insurance
- Team outing and lunches
- Reimbursement as per HR policies:
 1. Internet reimbursement upto 1500
 2. Commutation reimbursement upto 6000
 3. ISD reimbursement
